

Engine widget embedding

This document is intended to specify the steps needed to embed Roiback's engine widget on a website.

- [1. Embedding the widget](#)
 - [1.1. Embedding the widget in external websites](#)
 - [1.2. Embedding the widget in WordPress websites](#)

1. Embedding the widget

1.1. Embedding the widget in external websites

There is a service available under the "/roi-widgets/script-generator" URL which contains the script which has to be embedded in any website in order to have the widget rendered.

EN: <https://grandmajestichotels.backhotelite.com/en/roi-widgets/script-generator>

AR: <https://grandmajestichotels.backhotelite.com/ar/roi-widgets/script-generator>

1.2. Embedding the widget in WordPress websites

There is a service available under the "/roi-widgets/wordpress-script-generator" URL (e.g.: <https://grandmajestichotels.backhotelite.com/en/roi-widgets/wordpress-script-generator>) which contains the instructions to install the widget in a WordPress site.

The image shows two versions of a hotel booking widget. The top version is a large, rounded rectangle with a light gray background. It features two columns for dates: 'CHECK-IN 21 MAY 2018' and 'CHECK-OUT 22 MAY 2018'. Below these is a 'Promotional code' field with a horizontal line underneath. At the bottom is a large blue button with the text 'MAKE A RESERVATION'. The bottom version is a smaller, horizontal widget with the same date fields, a 'Promotional code' label above a horizontal line, and a blue 'MAKE A RESERVATION' button.
